Hi Thuy,

Please find attached 2 versions: the version with "03022021\_IIP2" is the one that should be used as "final" with up to date edits (with a few new edits since the version I sent you earlier today), and the other "TH\_comments" version is just a reference for the comments, which indicates that the comments were addressed ( but is NOT up to date with all of the edits).

The comments version was so messy when including all of the track changes edits, that it was difficult to see what had been edited, so I decided to make the 2 versions in this way. Unfortunately to see the comment and then how the text was edited to address that comment, you have to look at the two versions next to each other, using the comments version only as a reference. Let me know if something is not clear...

-Ingeborg

Kimberly

Based on today's meeting with the containers' group about PFAS formation during fluorination, I have added a new paragraph in the cover memo, under the Conclusion section.  
I did send this revised memo over to Tracy Williamson and Tristan Butler for comments. This attached version includes their comments.

Let me know what you think  
Thanks  
Thuy

Tala, do you have any comments on these? Ed has cleared, but wanted to make sure you had the chance to review as well.

For the 3:00 with Michal, please see attached for a working draft of the PFAS rinsate data and cover memo. Appendices are in the PDF. I've included my comments on the word version of the cover memo in the interest of time, thinking that you both can add your comments to the same file for Thuy and Yaorong.

Let us know if you have any questions. Mike, can you send me the invite to the 3:00? Or, I can pull the link off of your calendar. Many thanks.

Kimberly

Attached is the cover memo of the report for your comment/edit. It still has "DRAFT" watermark. I will remove it after your review

The pdf of the full report is also attached here

Let me know if you have any question

Thanks

Thuy
